LinkedIn: linkedin.com/in/ajinkyadesai77 | Portfolio: ajinkyadesai-git.github.io

Software Engineer with experience in application development, API integrations, GenAI workflow automation, cloud-based data pipelines, and enterprise systems. Skilled in Python, SQL, GCP, Vertex AI, and LLM-powered application development.

EXPERIENCE

Connor Group Inc — *Fremont, CA*

Solutions Engineer *(Python, Workato, REST APIs, HubSpot, NetSuite, VLEX)* *Sep 2025 – Present*

- Developed Workato integration workflows across HubSpot, NetSuite, and VLEX to automate customer, employee, sales order, renewal, provisioning, and attachment sync use cases
- Implemented field mappings, automation logic, and API-based validation handling to support reliable data exchange across enterprise platforms, reducing manual processing time by 30 percent
- Built and tested integration recipes using REST APIs, webhook triggers, and conditional branching logic to handle edge cases and exception flows

Miller Center for Global Impact — *Santa Clara, CA*

Software Engineer *(SQL, Python, Looker, GCP, BigQuery)* *Jul 2025 – Sep 2025*

- Built GCP-based data validation pipelines and Looker monitoring dashboards, improving platform uptime by 18 percent and reducing operational errors by approximately 80 percent
- Developed SQL and Python analytics workflows to automate system health monitoring and operational reporting for the eWAKA product platform

BoxPower Inc — *Santa Clara, CA*

Technical Product Program Analyst Intern *(SQL, Python, Tableau, ETL)* *Jul 2024 – Dec 2024*

- Built ETL pipelines using SQL and Python to support forecasting and pricing analysis workflows
- Developed Tableau dashboards and reporting layers for business performance analysis and executive visibility

Mastek (Formerly Evosys) Private Limited — *Ahmedabad, Gujarat*

Software Engineer L1 *(React-Native, Java, Swift, Rest APIs)* *Apr 2019 – Oct 2021*

- Developed front-end features and REST API integrations for enterprise mobile applications using React Native, Java, and Swift across EMEA markets
- Translated product requirements into application features, supported SaaS rollouts, and built product analytics dashboards that improved stakeholder visibility by 15 percent

PROJECTS

Ticket Triage to Sprint Ready — Agentic Jira Workflow *(Python, LLM APIs, Prompt Engineering, Jira API) Jul 2025 – Sep 2025*

- Built a Python-based agentic workflow that uses LLM APIs and multi-step prompt templates to classify issue descriptions, extract structured fields, assign severity, and auto-generate clean Jira-ready tickets
- Implemented output validation, exception handling, and conditional routing logic, reducing mean time to sprint readiness by approximately 40 percent

Palo Alto Networks Practicum — GenAI and Analytics *(Vertex AI, BigQuery, GCP, Tableau, Python).* *Feb 2024 – Jun 2024*

- Prototyped ML and Vertex AI experiments to evaluate feature quality and support product analytics decisions on GCP
- Standardized SQL datasets in BigQuery, defined KPI trees, and published Tableau executive dashboards, reducing recurring benchmarking effort by approximately 80 percent

PwC Virtual Experience — Customer Analytics *(Power BI, Python)* *Jan 2023 – Mar 2023*

- Built Power BI dashboards for churn and satisfaction analysis and framed data-driven go-to-market recommendations

EDUCATION

Santa Clara University, Leavey School of Business — *Santa Clara, CA*
Master of Science in Information Systems | *Jun 2025*
Relevant Coursework: Applied Data Science, Gen AI, Machine Learning, Software Product Management

SKILLS AND TOOLS

- Languages and Data: Python, SQL, React Native, Java, Swift, ETL, Data Modeling
- Cloud and Tools: GCP, BigQuery, Looker, Tableau, Power BI, Jupyter Notebook, GitHub
- AI and GenAI: LLM APIs (Gemini, Vertex AI, OpenAI, Azure AI), Prompt Engineering, Agentic Workflows
- Systems and Integration: API Integration, Workflow Automation, Workato, Enterprise Systems, Salesforce, NetSuite, Jira, Confluence

CERTIFICATION AND ACTIVITIES

- Stanford – _Mastering Generative AI for Product Innovation
- Microsoft Azure AI Engineer Associate
- Workato Automation Pro II
- Google Professional Data Analytics Certification
- VP, SCU AI Club – led 3+ campus-wide events on AI product development
